

Gather a team & Join iGEM MENA League Competition!

Are you looking for an opportunity to explore cutting-edge scientific advances, get involved in real life team projects, and compete in a prestigious competition?

iGEM MENA League is a Synthetic Biology competition that enables high school and undergraduate students to Why participate? It's your opportunity to Learn, Ideate, and Compete.

- Dive into the field, learn from top experts and from their peers through access to iGEM Academy.
- Cultivate technical, analytical, and soft skills.
- Network globally.
- Brainstorm, and propose innovative solutions to real-world problems in their communities.
- Get the projects evaluated by an international and multidisciplinary panel of judges.

Synthetic Biology is a field with applications in all aspects of life, from medicine to agriculture, energy, the environment and more. Your project could be in one of the competition tracks.

Every year, students from all over the world use synthetic biology to build projects to solve community problems.
